Engineering Review

Dear Ms. Gasses:

As requested, we have completed our review of the proposed site plan for the above referenced project. Our review services were limited to a review of the stormwater report by Berry Surveying & Engineering (dated January 2, 2013) and associated Site Plan (revision date December 31, 2012). The following were comments noted during the review:

1. The drainage report was not stamped and signed by a professional engineer.
2. The plans were not stamped and signed by a wetland scientist.
3. The pre and post development drainage plans (W1 and W2) were not included with the stormwater report.
4. The stormwater report existing conditions references Arch Street, the City of Dover and an existing barn. The proposed conditions references stormwater systems not shown on the plans. We would recommend that the applicant review and resubmit the report.

If you should have any questions or comments, please call me.

Very truly yours,
DuBOIS & KING, INC.

Jeffrey A. Adler, P.E.
Senior Project Manager
